DESIGNING FOR SUCCESS

A Collaborative Approach by the Architect and Engineer

“ This urban re-hab development project is a joint-venture collaboration among the atelier 'Studio Arte - Architecture & Design' (Portimão), led by the Architect João Carriço, the Engineering firm 'Veritate - Projectos e Fiscalização, Lda.' (Portimão), led by the Engineer Stéphane Generoso and Carvoeiro Branco, a real estate investment promotor leading scaled urban developments in the southern Algarve region of Portugal.

Together, we set out to create a high-end new cosmopolitan development that seamlessly blends urban living community principles with eco-friendliness, sustainable philosophy and passive housing concepts.

The result is a striking building complex that emphasizes the importance of natural light/ventilation, open living concepts and constant outdoor living relations.

The use of natural based materials and a special focus on energy efficiency are evident throughout the development, from the sun break filters, solar panels systems and LED lighting installations to reduce energy consumption.

We are honored to have partnered with Carvoeiro Branco in the creation of Atrium Liberdade, a development that we believe will foster a sense of community and provide a comfortable and sustainable living experience for its residents. As creative architects, our main goal was to design a spatial complex that not only looks visually attractive, but also functions efficiently and responsibly.

The collaboration with Carvoeiro Branco allowed us to bring our distinct vision to fruition and we are excited to see it come to life, transforming Lagoa's urban landscape for the present times and nearby future. ”
